PROFESSIONAL SUMMARY

Computer Science undergraduate (B.Tech, Mohan Babu University, 2028) who builds full-stack web applications (React, Node.js, MySQL, Firebase) and IoT/embedded systems (ESP32, Raspberry Pi) on a solid foundation in Data Structures, OOP, and DBMS. Turned a building energy audit into a reusable Java cost-calculation model, and is now developing CampusConnect, a multi-role student platform. Skilled at leveraging AI tools effectively in development workflows, with a strong ability to quickly learn and adapt to new technologies.

EDUCATION

B.Tech, Computer Science and Engineering — Mohan Babu University, Tirupati, AP 2024 – 2028
CGPA: 8.01 / 10

Intermediate (12th), BIEAP — Tirumala Junior College 2024 · 83%

10th, ICSE — De Paul E.M. School 2022 · 80%

TECHNICAL SKILLS

Languages: C++, Java, Python
Web / Full-Stack: HTML, CSS, JavaScript
Databases: MySQL, Firebase
CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering
IoT / Embedded: ESP32, Raspberry Pi, Sensor Integration
Tools & Platforms: Git/GitHub, VS Code, Linux/Ubuntu, PyCharm, Excel

PROJECTS

CampusConnect — Centralized Student Platform (Team of 3) *In Progress*

- Building a platform connecting students to placements, clubs, events, question banks, and opportunities, with distinct student/admin/club-event roles.
- Implementing authentication and access-control flows, student profile management, and a MySQL/Firebase data layer.
- Designing a skill-based teammate-matching feature using React, Node.js, and Express.js.

AI/ML & Data Analytics — Output-Prediction Study (Team of 2) *Idea / Planning*

- Scoping an output-prediction problem across structured, image, text, time-series, and financial data; leading early data collection, feature selection, and research-methodology design.

EXPERIENCE

Intern — Smart Energy Audit & Tariff Analysis, Mohan Babu University Mar 2025 (On-site)

- Surveyed and classified 1,000+ appliances across 4 floors, recording power ratings and usage patterns for a full building energy audit.
- Built a Java-based computational model to calculate monthly/yearly energy consumption, billing costs, and Load, Demand, and Utilization Factor metrics.
- Analyzed tariff structures against consumption data to surface cost-saving opportunities; documented methodology and findings in a technical report for university stakeholders.
- Coordinated with a project team to consolidate data collection, analysis, and reporting across all 4 floors.
- Designed the model to be reusable — capable of computing electrical consumption metrics and tariff costs for any building, given its appliance and rate data as input.

CERTIFICATIONS

- **Agile Development & Scrum:** Agile Dev Practices & SDLC/Project Management (Northeastern University); Working as a Scrum Master & Introduction to Scrum Master Profession (SkillUp); Introduction to Agile Development and Scrum (IBM)
- **Business & Innovation:** Entrepreneurship II: Preparing for Launch; Strategic Innovation: Managing Innovation Initiatives (both University of Illinois Urbana-Champaign)

LEADERSHIP & ACHIEVEMENTS

- **2nd Place, Project Expo** — Technovation 2K25, KSRM College of Engineering (2025)
- College Hackathon Participant
- **Student Coordinator**, Mohan Babu University — coordinated academic activities, events, and feedback for 500+ students
- **Technical/Team Lead** — managed task allocation, progress tracking, and cross-team communication on academic project teams

SOFT SKILLS

Leadership & Coordination, Technical Adaptability, Continuous Learning, Communication

LANGUAGES

English, Telugu
